MORE OPTIONS TO HELP YOU BUILD SOMETHING BETTER

OCTAFORM STAY-IN-PLACE CONCRETE FORMS

Our stay-in-place, PVC forms are ideal for the intense environments of digesters, aquaculture tanks, agriculture and even car washes.

Octaform forms and protects your structure in one step leaving a watertight and corrosion-resistant finish that will outlast the rest.

QUICKLINER VINYL WALL & CEILING PANELS

NEW

The technology that is already protecting concrete from some of the harshest environments in the world can now protect your existing walls and ceiling.

OCTAFORM QUICKLINER fastens to your structure and instantly transforms dark, dingy walls into a clean and bright environment that is resistant to corrosion, fade and dirt.

OCTAFORM AGRICULTURE TANKS/FACILITIES

**I WAS AMAZED AT HOW FAST
IT WENT UP & THE QUALITY IS GREAT.
MIKE WALDNER, PORTAGE LA PRAIRIE**

BARNs

Barn walls formed with Octaform are easy to clean, look great and can even lower energy and insurance costs.

Octaform walls use less energy than most wooden barns to heat, cool and even light the facilities. This stable environment helps eliminate livestock stress and as a result, farmers report faster growth and less loss due to heat stress.

Octaform formwork and cladding products are durable, easy to clean and will not support the growth of mold.

TANKs

The advantages of building tanks with Octaform are many and other sectors have already embraced our superior tank technology.

It goes up quickly and its built-in, corrosion-resistant PVC finish ensures that your tank will outlast and outperform just about any alternative.

BIOGAS

The conversion of agricultural waste to clean, renewable energy is a relatively new concept to North America but German biogas experts are already turning to Octaform tank technology for their systems.

As European builders and farmers already know, anaerobic digestion is a highly corrosive process that will test the limits of any tank. Octaform's built-in PVC finish offers the best possible defence against this while giving builders a fast, economic alternative to conventional formwork.
