

# Double Membrane Cover

COVERING A GREEN FUTURE

### Components

- 1) Quality membranes: inner membrane
- 2) Quality membranes: outer membrane
- 3) Quality membranes: clamping profile set
- 4) Support construction: column
- 5) Support construction: crown ring
- 6) Support construction: belts
- 7) Over-/underpressure valve
- 8) Ventilator system

### Optional:

- Gas volume measurement system
- Desulfurization net
- Rainskirt

*Please find the corresponding flyers for more information regarding these products.*

### Double Membrane

MSE's Double Membranes give you the opportunity to store more gas in your plant(s). This way, you are always in control of how much gas you want to take out. Especially in combination with our Biogas Domes (gas storage - see flyer), our Double membranes could be very interesting for you!

### Benefits for you

Our Double Membranes can be used for anaerobic digestion installations in the agricultural market as well as for industrial wastewater treatment plants. We always deliver a complete, safe and high quality product. Our Double Membranes are 100% frequency welded and available up to a diameter of 40 meter. Our experienced and skilled installation and service crew will install the products competently. This means during the entire process you have nothing to worry about!

### Technical specifications

- 100% High-frequency welded membranes
- Available up to a diameter of 40 meters
- Operating pressure up to 20 mBar
- Lowest possible gas permeability
- Statical calculation applied to complete installation
