

**140 YEARS OF
EXPERIENCE**

FULL**AUTO**
FILTER PRESS

FULLAUTO

FILTER PRESS

FACTS

Runs 24h/7 without operator intervention

Integration into continuous automatic processes

Simple, robust and reliable

High performance cake dryness

Municipal & Industrial applications

A
OVER A
1000
INSTALLATIONS

AREAS OF APPLICATION

Dewatering of sludges from:

Municipal sludges, drinking water plants, industrial slurry

- Aggressive media

Industrial effluent

- Agri-food industry
- Mines and quarries
- Hydrometallurgy
- Surface treatment
- Exhaust gas scrubbing
- Chemicals and pigments
- etc.

Industrial filtration processes

- Agri-food industry (sugar, oils, wine, algae, etc.)
- conventional and composite ceramics
- chemical industry
- pharmaceutical industry

THE UNIQUE AND FULLY AUTOMATIC ROBOT

The Robot takes care of:

Plate weighing

For sticky material, plates are automatically weighed during the cake discharge cycle. A plate over weight detection will generate a shaking cycle.

Automatic Core Blower

Robot may also be equipped with a core cleaning mechanism.

Plate shaking

Plates will be shaken automatically if required by the nature of the sludge or by the command of the plate weighing device.

Automatic wash

Robot can be equipped with a mobile wash manifold to be used with high pressure water or in some specific applications, acid solution.

«This simple and inexpensive solution leaves the cloths untouched and ensures that they remain intact.»

PROCESS COMPONENTS

Filter press peripherals

The following units can be offered as an option to produce a turn key plant operation: conveyors, transfer pumps, dosage pumps, agitators, flocculation tank, settlement tank, reactor, etc.

Cake collection

- Direct drop can be used or conveyors can be supplied to accommodate customer needs.

Protection of personnel

- Light curtains, pull cords and barriers which comply with UL, CSA or other regulations can be provided.

High-pressure cloth washing

- For a larger size press and for automation purposes, a booster pump can be supplied.

Acid washing

- Acid dilution and feeding system can be supplied when needed by the application.

Electrical control cabinets

- Operator interface allowing friendly operation and control provided with PLC as per the customer requirements.

Cake discharge

- **100% automatic:** the device for shaking the plates is connected to a weighing system which ensures that the cakes are discharged without operator intervention.
- Anti-corrosion mechanized cake discharge: this accurate and reliable device enables the chambers to open without operator intervention. The stainless steel material ensures that they remain in perfect condition over time.
